SYSTEM M

VARIETY IS TOP OF OUR AGENDA

SYSTEM M

SYSTEMATIC FLEXIBILITY

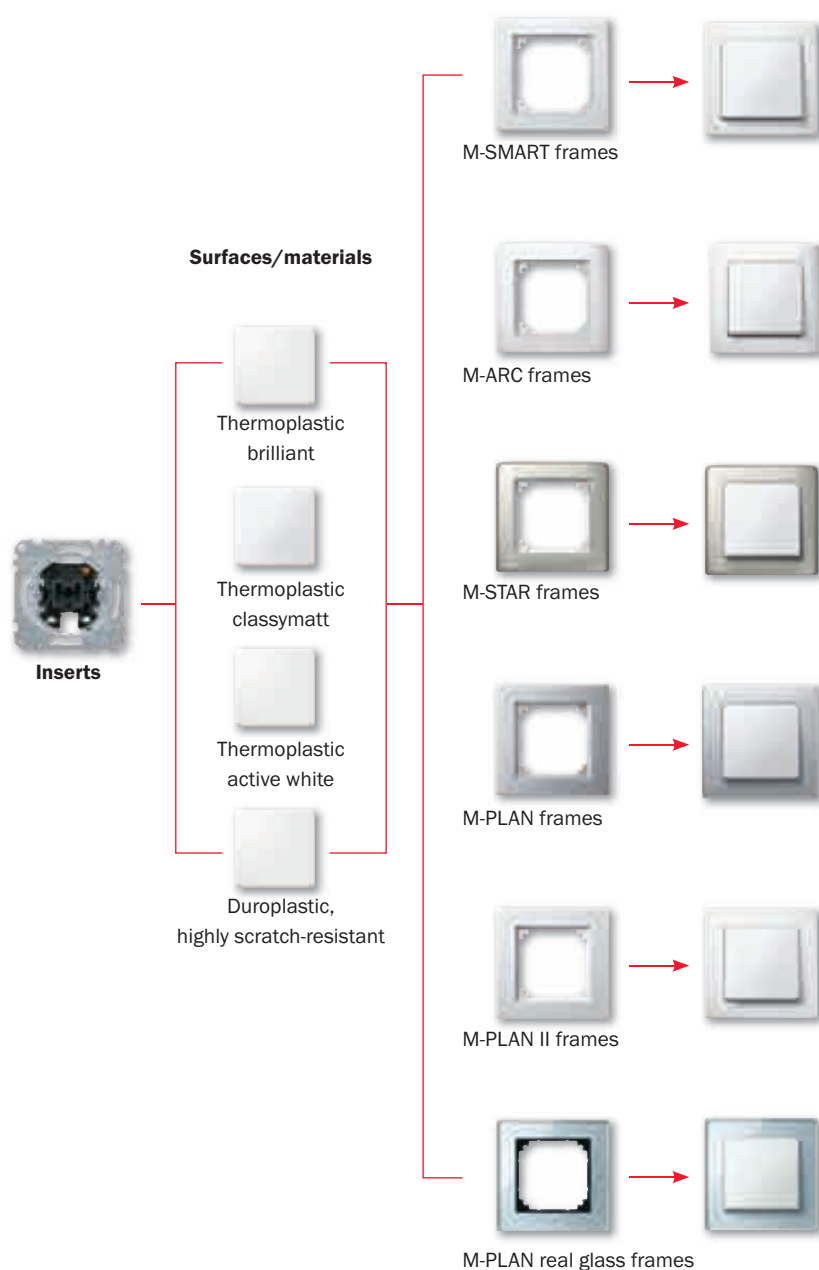

A system with many combination possibilities. That's what makes System M one of the most flexible switch ranges around. Design and surface options can be exchanged and combined with each other without having to replace the insert.

What makes the multi award-winning System M so unique?

- 4 options with different surfaces and materials: thermoplastic classymatt, thermoplastic brilliant, duroplastic highly scratch-resistant, thermoplastic active white.
- 6 different design options: M-SMART, M-ARC, M-STAR, M-PLAN, M-PLAN II, M-PLAN real glass
- Inserts for more than 210 functions

The System M principle

No other switch range offers greater variety and flexibility to adapt to new design requirements. The System M inserts fit all design and surface options. Just change the frame or rocker, and the job is done.

An example of System M: M-PLAN with glass frame and rocker, thermoplastic brilliant, glossy polar white

System M has won numerous design awards.
Here are just a few:

MATERIALS & SURFACES

A DAZZLING IMPRESSION

THERMOPLASTIC BRILLIANT

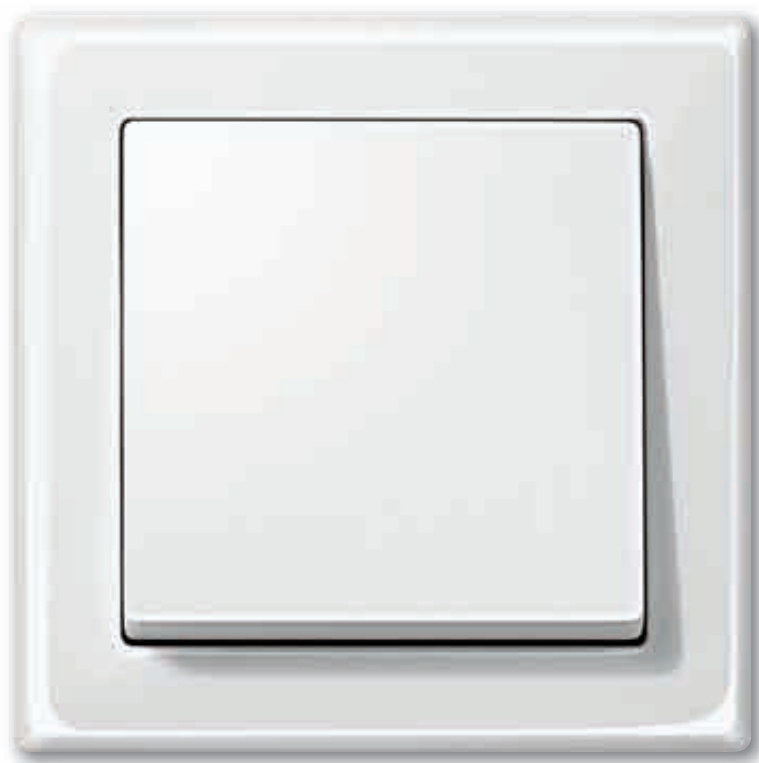

In this case, it's the surface that counts! That's because it's not only brilliant and shiny, but – thanks to thermoplastic – it's also extremely shatter-proof.

Inserts/colours:

- White, glossy
- Polar white, glossy
- Active white, glossy

Frame design:

- M-SMART

Thermoplastic brilliant, here in the M-SMART design option

MATERIALS & SURFACES

DISCREET AND STYLISH

THERMOPLASTIC CLASSYMATT

Its modern appearance is captivating:
System M in thermoplastic classymatt.
Discreet, high quality and - thanks to
the thermoplastic material - extremely
shatter-proof.

Inserts/colours:

- White
- Polar white
- Anthracite
- Aluminium

Frame design:

- M-SMART
- M-ARC
- M-PLAN
- M-PLAN II

Thermoplastic classymatt, here in the M-PLAN design option

MATERIALS & SURFACES

NICE AND SHINY, NICE AND STRONG

DUROPLASTIC HIGHLY SCRATCH-RESISTANT

Equipping rooms with a duroplastic switch range not only gives them a dazzling appearance, but the surfaces of the switches are also highly scratch-resistant. These are the best conditions for ensuring long-lasting enjoyment of this attractive material.

Inserts/colours:

- White
- Polar white

Frame design:

- M-SMART

Duroplastic highly scratch-resistant, here in the M-SMART design option

MATERIALS & SURFACES

A CLEAN DEAL

THERMOPLASTIC ACTIVE WHITE

Whether for hotels, restaurants, airports, schools, nurseries, catering kitchens, hospitals or anywhere where hygiene is particularly important, thermoplastic active white is the ideal surface. Natural silver ions in the thermoplastic material have an anti-bacterial effect and therefore protect against surface-borne infection. Many clinical studies have shown that thermoplastic active white eradicates bacteria within 24 hours.

Inserts/colours:

- Active white, glossy

Frame design:

- M-SMART

Thermoplastic active white, here in the M-SMART design option

DESIGN OPTIONS

M-ARC | M-STAR

M-ARC

DYNAMIC AND ELEGANT

The dynamic transition from rocker to frame gives the harmoniously curved M-ARC its individual character.

M-ARC, frame and rocker, thermoplastic classymatt, polar white

M-STAR **A TOUCH OF ELEGANCE FOR EVERY WALL**

M-STAR lends style and character to every room, with high-quality frame options in satin silver, chrome and polished brass.

M-STAR, frame in chrome, rocker in thermoplastic brilliant, glossy polar white

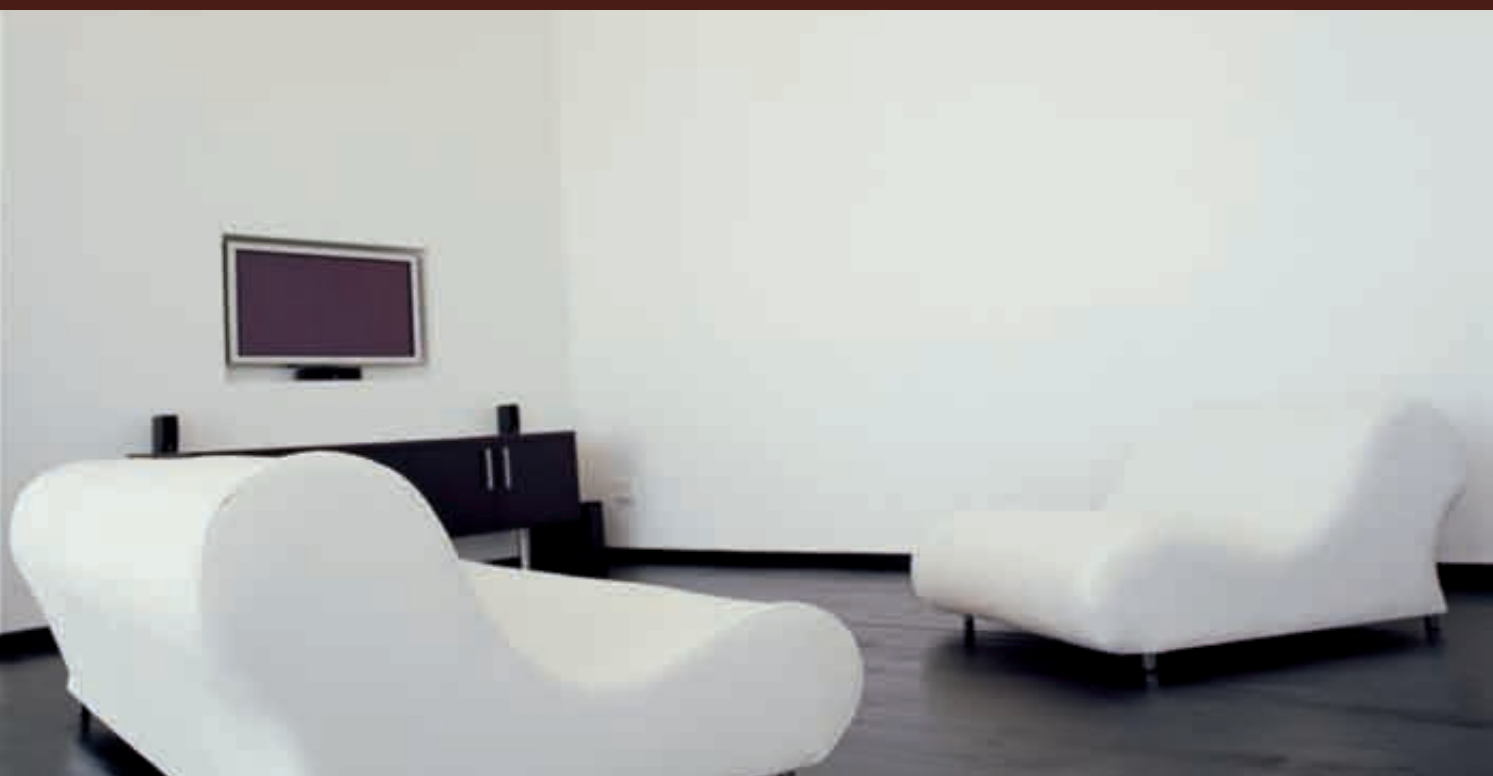

M-PLAN CLEAR ESSENTIALS

M-PLAN has discovered the essence of good form - and doesn't need to shout about it. The ideal switch for anyone who is a fan of discreet design.

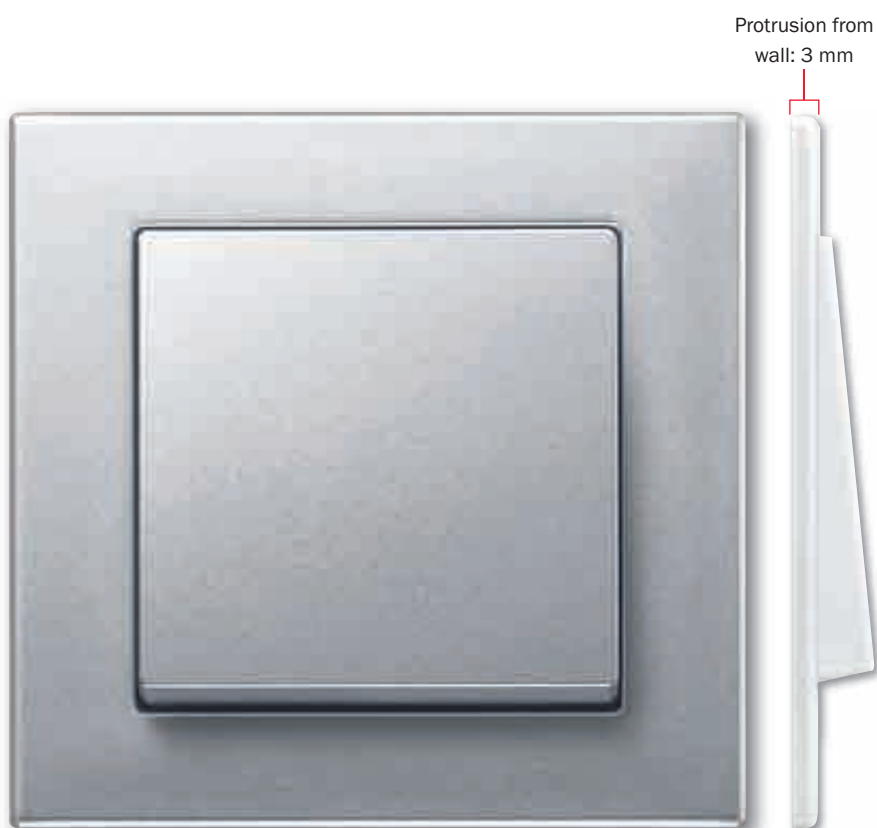

M-PLAN, frame and rocker, thermoplastic classymatt, anthracite

M-PLAN II **BECAUSE LESS IS MORE**

You don't have to overdo it for a splendid result. With M-PLAN II this is child's play since all but 3 mm of the control interface is concealed in the wall. Using the flush-mounting adapter, up to 210 System M functions can be installed in almost all walls.

M-PLAN II, frame and rocker, thermoplastic classymatt, aluminium

M-PLAN REAL GLASS UNADULTERATED ELEGANCE

Distinctive, aesthetic, and high quality – the much-awarded M-PLAN series now has another design option: real glass frames. In combination with different surfaces such as a rocker made from thermoplastic brilliant - a top class switch.

M-PLAN real glass, frame in diamond, rocker in thermoplastic brilliant, glossy polar white

M-SMART **NICE AND SOLID**

No matter what character your individual living style has, the linear forms and discreet radiance of the M-SMART switch make it an ideal choice. In short: the perfect basic switch which is now available in all four material and surface options: thermoplastic brilliant, thermoplastic classymatt, thermoplastic active white, duroplastic highly scratch-resistant. Smart, isn't it?
