

RA2 Select

Complete smart
lighting and blinds
control solutions

Introducing RA2 Select.

Personalised smart lighting and blind control for any budget.

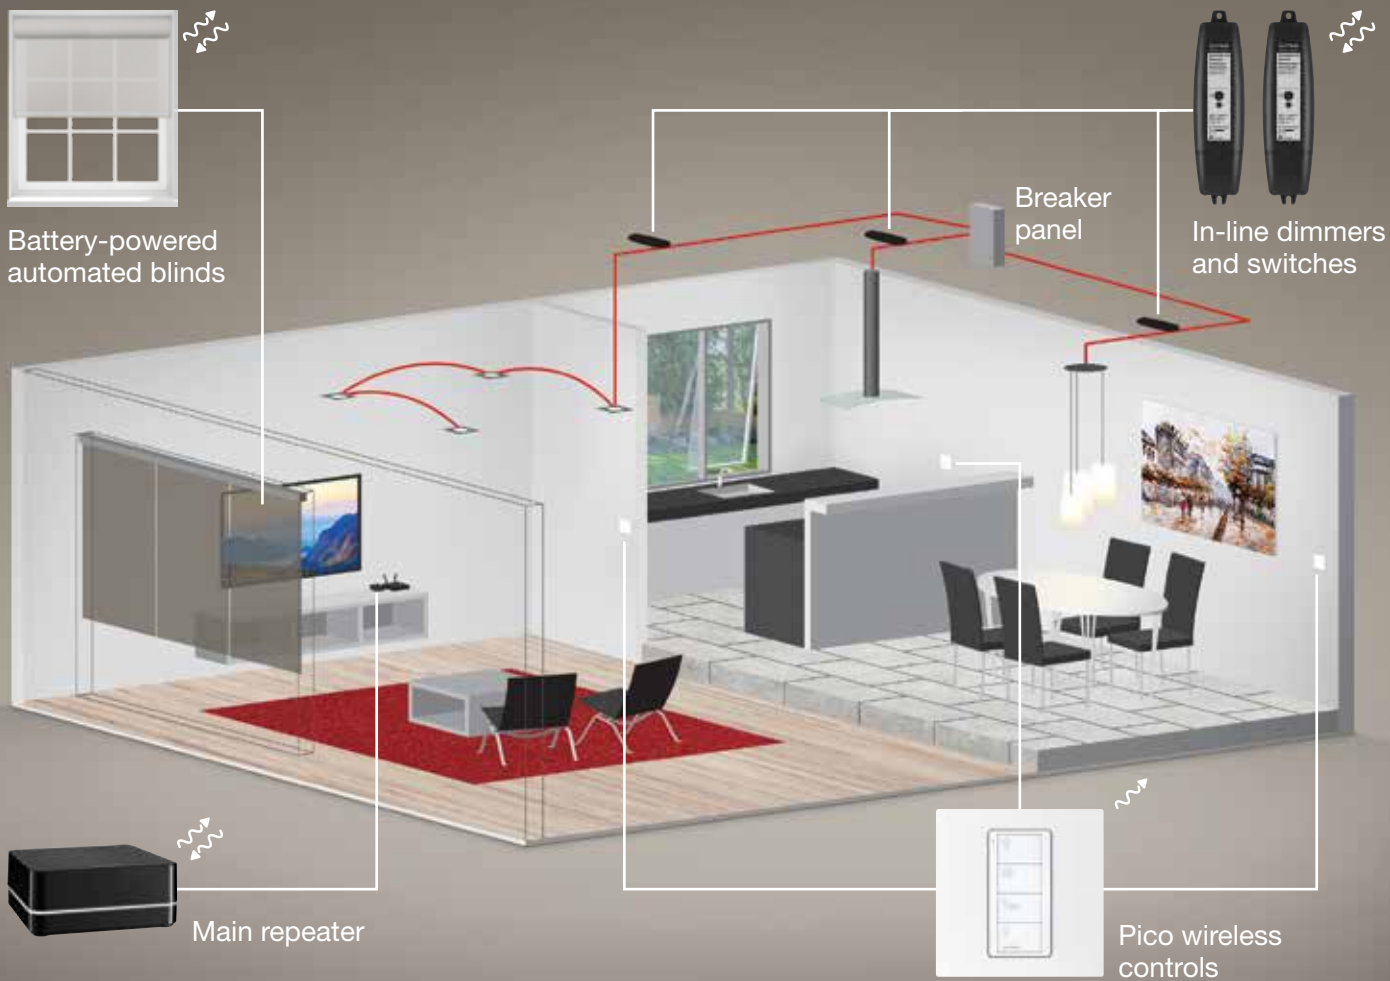

Why RA2 Select?

Simple. App-based setup, control, and monitoring; no training or PC required.

Fast. Pico scene keypads automatically configure typical lighting scenes based on the room and activity; no programming necessary.

Flexible. Scalable up to 100 devices, including 4 Lutron wireless repeaters to extend range throughout the home.

Simple wireless solution

In-line dimmer/in-line switch fits in the ceiling void for fast, convenient installation. Pico wireless controls require no wires and batteries will last 10 years.

The main repeater is connected to the home network to enable setup, control, and monitoring via the Lutron App.

Pico scene keypad

Transform a room

Easily set multiple lights and blinds to just the right level, creating scenes for any activity. Scene keypads automatically configure to provide the best lighting for the task at hand in each scene.

In the kitchen, for example, lights and blinds can adjust for cooking, a quiet dinner, or cleaning up.

	 Ceiling lights	 Island lights	 Cabinet lights	 Blinds
 Bright	100%	100%	100%	Open
 Cooking	100%	100%	50%	75% Open
 Dining	20%	65%	50%	Half Open
Off	Off	Off	Off	Closed

Scene keypad

Remote control

Add control anywhere

The Pico is flexible, for control wherever it works best.

Mount it to a tabletop pedestal. Pedestals are available in single, double, and triple configurations.

Or mount it to a wall without cutting a hole or wiring anything. Add a screwless wallplate for a finishing touch.

Smart home made simple

Three key app features that will make a homeowner's life easier:

Scheduling — automatically adjusts lights and blinds at set times of day.

Geofencing — controls lights based on your location.

This feature can turn lights on for you when you arrive home and notify you if you have left lights on when you leave.

Setup made simple

Contractor setup in the Lutron App means you can bypass the homeowner registration process and quickly configure the system. The homeowner can register and access his system via an invitation from you. He can also access your contact information from the app if he needs professional support.

Smart Away — randomly turns lights on and off in the evening, so it looks like you're home, even when you're not.

Expand the system

RA2 Select works with smart home solutions from other best-in-class brands, to add even more convenience to your customers' lives.

Amazon Alexa

Create just the right light using Alexa voice control. Ask Alexa to turn lights on, off, or dim them to your favourite level. (Not available in China)

Apple® HomeKit™

The Smart Bridge contains Apple HomeKit technology, so you can use Siri® to control your lights and blinds.

The Google® Assistant

Control lights and blinds with just your voice. (Not available in China)

Honeywell Wi-Fi Thermostats

Choose from a wide variety of thermostat options to control the temperature in your home, from anywhere. Compatible with all Honeywell Wi-Fi thermostats, including Lyric Round and T Series. (Not available in all countries)

IFTTT (If This Then That)

Create IFTTT recipes: a sequence of conditions that when triggered (If This) cause your RA2 Select system to turn on the lights or open the blinds (Then That).

Sonos

Control your Sonos Home Sound System from a Pico remote control for audio, from scenes in the Lutron App, or from a Pico scene keypad.
